SUMMARY

Computer Science graduate specializing in Artificial Intelligence & Analytics with internship experience in software development and hands-on expertise in machine learning, data analytics, and full-stack application development. Skilled in Python, SQL, AWS, React, and data visualization, with experience building recommendation systems, analytics dashboards, and ML-based applications.

EDUCATION

MIT School of Computing, Pune (2022-2026)
Bachelor of Technology in Computer Science (Artificial Intelligence & Analytics)
CGPA: 7.91/10

Graduated: 2026

EXPERIENCE

Software Development Intern | Inspira Enterprise
Mumbai, Maharashtra, India.

June 2026 - Present 2026

- Developed and enhanced product management workflows using React, TypeScript, Python, SQL, and PostgreSQL.
- Built a project/product recommendation module using Python, SQL, JSON processing, and backend APIs to improve product discovery workflows.
- Utilized Git, Docker, and PostgreSQL for version control, containerized development, and database management.

TECHNICAL SKILLS

Programming Languages: Python, SQL, Java, C++, R
Web Technologies: HTML, CSS, JavaScript, React, TypeScript, Node.js, Express.js
Machine Learning & Analytics: Scikit-Learn, PyTorch, Pandas, NumPy, OpenCV, NLP
Data Visualization: Tableau, Matplotlib
Databases: MySQL, PostgreSQL, MongoDB
Tools & Cloud: Git, GitHub, Docker, AWS, VS Code, Streamlit

PROJECTS

TaskFlow/Task Manager | React, Node.js, Express.js, MongoDB | [GitHub](#)

- Built a full-stack task management platform with JWT authentication, role-based access control, and REST APIs using React, Node.js, Express, and MongoDB.
- Developed secure CRUD workflows, user management, and administrative controls with protected routes and input validation.
- Implemented API documentation using Swagger and security features including password hashing, JWT authentication, and rate limiting.
- Designed a scalable architecture separating frontend, backend, database, and middleware layers.

Signature Verification System | Python, OpenCV, ML | [GitHub](#)

- Developed a machine learning-based signature verification system to classify genuine and forged handwritten signatures.
- Implemented OpenCV-based image preprocessing and feature extraction using contour, texture, and shape descriptors.
- Trained and evaluated a Random Forest classifier using accuracy, precision, recall, and F1-score metrics.
- Built an interactive interface visualizing the complete signature verification pipeline from preprocessing to classification.

Netflix Content Analysis Dashboard | Tableau, Excel | [GitHub](#)

- Developed an interactive Tableau dashboard to analyze Netflix movies and TV shows across genres, countries, release years, and content ratings.
- Performed data cleaning and transformation to improve data quality and visualization accuracy.
- Created KPI dashboards, filters, and interactive visualizations to identify content distribution trends and audience-focused insights.
- Analyzed patterns in content type, release timelines, and regional availability to support data-driven decision-making.

Finance Data Tracker | Python, Pandas, Matplotlib | [GitHub](#)

- Developed a finance analytics dashboard using Python, Pandas, Matplotlib, and Streamlit to analyze financial transaction data.
- Performed data cleaning, preprocessing, and KPI analysis on financial records to generate actionable insights.
- Built interactive visualizations for spending breakdowns, monthly trends, savings analysis, and expense tracking.
- Designed automated reports and dashboards to support budgeting, spending optimization, and financial decision-making.

PUBLICATIONS

EEG Based Authentication System | IJERT Publication | [Paper Link](#)

- International Journal of Engineering Research & Technology (IJERT), Vol. 15, Issue 05, May 2026
- Published research on EEG-based biometric authentication using machine learning for secure user identification and spoofing resistance.

CERTIFICATIONS | [Credentials](#)

- Microsoft Certified: Azure AI Apps and Agents - Microsoft
- AWS Academy Graduate: Cloud Foundations - AWS Academy
- Neural Networks and Deep Learning - DeepLearning.AI
- Exploratory Data Analysis for Machine Learning - IBM
